Application Number: 10/002,888
GRP ART UNIT: - 3728
Filing/Receipt Date: 12.05.2001

Commissioner of Patents:

PETITION TO REVIVE THE APPLICATION

My invention: "A device for distributing antibacterial spray in a human shoe" was filed in Patent and Trademark Office on 12.05.2001. Since then I've never got the result from the examiner. When I got suspicious about it I called United States Patent and Trademark Office on April 8, 2004. They told me that two notices: rejection of the claims and abandonment were sent to my address. But the fact is that I have never got them.

There are other stores and private organizations located on the first floor of my building. It happens sometimes that the mailman makes mistake and brings my letters to other people in the mentioned organizations. I believe that it happened so this time also.

So, please, take this into your consideration and revive my application as soon as possible.

With Respect, Meir Ibguy
